## texture glossy S104

INTERIOR

RIEDER

The exquisite texture is an interior highlight and an elegant eye-catcher. The shiny surface reflects the light and creates a new space effect. The slabs have a different look depending on how the light falls. This texture particularly emphasises the vivid surface characteristic of concrete with its interplay of colour shades and cloud effects. The natural appearance of the material changes over time, giving each panel a unique look.

## texture slate *SI02*

RIEDER

The appearance of the texture is based on slate slabs and their natural layers. A unique light refraction occurs at the edges of the rock layers, causing them to stand out to varying degrees depending on the angle the light hits. Since light conditions change over the course of the day, the facade with this texture has a different appearance depending on the time of day. This gives the building a vibrant and natural look. Like an image of nature, the facade blends harmoniously into its surroundings.

## texture lumber S103

RIEDER

lumber is based on an authentic natural look. A homogeneous wood grain lends the building envelope a strong depth effect. Similar to wood, the facade panels have a multi-layered effect, but unlike wood, they do not require additional weather protection.
